

## **Villa Caballeros Homeowners Association**

### **Entry Gate Remote Controls | Entry Gate Kiosk System**

Villa Caballeros uses Entry Gate Remote Controls to open the Main Gate on Avenida Caballeros and the side gate on Arenas for Owners and Residents. An Entry Gate Kiosk (Cellgate™ W480 System) is present at the Main Gate for controlled access. Owners and Residents can register on the Entry Gate Kiosk to manage visitors, guests, deliveries and service vendors through phone access or a smart phone app.

Upon the purchase of your property, the previous Owner is obligated to provide the new Owner with the remote control “clickers” that were provided for a given unit.

If remote control devices are not available, new devices can be obtained from Property Management for \$25 each. Please contact the Property Management office for assistance.

Instructions for Use for the Cellgate™ System can be obtained from the association website. To register as a new Owner or Resident in the system, please contact Property Management and provide the following information:

- Name to appear on the Kiosk Directory
- Phone number for contact
- Email address
